## STORAGE OF HERBS & FINISHED TEA

### Storage of the Essiac Herbs - in a dark and dry place

Store the unused packets of Essiac herbs in a dark, cool & dry place. The herbs are light sensitive. Unopened packets of herbs will stay fresh for up to one year from date of purchase. Store in coloured glass jars (amber/brown) if stored in the open to screen the herbs from UV rays. However this does not extend the one year shelf life of the herbs.

**Do not microwave, refrigerate or freeze the Essiac herbs or they will loose their potency!**

### Storing the finished Essiac Tea - In the Fridge or cool cellar until opened in the dark

The finished Essiac tea must be stored in glass bottles with metal lids. All containers **MUST** be thoroughly cleaned with boiling water prior to use, and glass and metal can be thoroughly and safely cleaned. Should lumps or mould appear in your stored Essiac tea, do not drink it, but discard it, and make a fresh brew. Store below 15 deg. C.

**Essiac Tea already opened must be refrigerated**, since there are no additives or preservatives. And they must be kept at a temperature not above 15 deg. C hence the fridge!

**When you take an opened bottle out to pour it be sure to replace the cap immediately and return it to the fridge to avoid contaminating it.**
